## A few Fun Facts for Your Saturday:

When you eat a pineapple, it eats you back. There is an enzyme called Bromelain that can (and does) digest the proteins of your mouth as you eat it.

Almonds are not nuts!

Almonds are fruits, specifically the pit of a fruit. They belong to the same family (prunus) as peaches. The part that we eat is the seed which is, in the fruit, surrounded by a hard shell (like a peach pit).

The largest waterfall in the world is under the sea(s). The water of the Denmark Strait Cataract consists of a mix between that of the (icy) Nordic Sea and the (warm) Irminger Sea. The difference in density causes the water to plummet down a 10,000ft cliff at 123 million cubic feet per second.

Windsor Castle was not, in fact, named after the House of Windsor. The royal family changed its name from Saxe-Coburg-Gotha in 1917 so it would sound less German and chose Windsor because they had connections with the town.

## More on Summer Workshop:

LASC Summer Workshop will be hosted this summer at Northwestern University in Natchitoches. It will be taking place from June sixth (a Sunday) to the tenth (that Thursday). Registration (getting keys and the like) will be from 1:00 to 3:00 p.m. on the day of arrival. Each school can send up to four students. Those who have already been, cannot go this time. Sadly, there will be no Junior High workshop this summer.

## Food for Thought

"Everybody is a genius. But if you judge a fish by its ability to climb a tree, it will live its whole life believing that it is stupid."

~Albert Einstein

"Singing is the closest you can get to freedom."

~My Daddy

(Because I liked it that much)

Happy belated Easter (if you celebrate it).
